

The Quality and Environment Policy

Quality and Environment: fundamental principles

We provide the customer with the most complete packaging solution, when needed, certified and functional.	EFFICIENCY	We work to reduce both the consumption of materials (production waste) and the consumption of energy in the production process.
We use our skills and our technologies to create an innovative product in tradition.	INNOVATION	We use our skills and our technologies to create an innovative product in tradition.
We design packaging with the aim of minimizing the environmental impact and develop eco-sustainable technologies.	SUSTAINABILITY	We are committed to protecting the environment with eco-sustainable processes and products.
We always work for the continuous improvement of the product and service.	IMPROVEMENT	We always work for the continuous improvement of the Management System and environmental performance.
We offer a targeted service to our customers able to satisfy every need.	SERVICE	We offer our customers a guarantee service through ISO 9001, ISO 14001, FSC and IPPC / FAO certifications.
We also certify our products by carrying out tests that reproduce the typical conditions of transport (ISTA).	RELIABILITY	We ensure compliance with process and product compliance obligations.
We create packaging solutions integrated into the corporate communication processes of our customers.	DESIGN	The packaging lifecycle minimizes the impact on the environment with recycled, high quality and 100% recyclable raw materials.
We invest in the safety of our employees and our customers' products.	SAFETY	We promote greater environmental and safety responsibility for our employees.

Thank you!

Grifal is the leading technology company in Italy for the design and production of high-performance and eco-sustainable **packaging** solutions.
